PROJECTS

TOTATS Tattoo Studio Administrative Scheduling, Product Catalog, and AI Inquiry System

Technologies used: REACT.js • Supabase • Gemini AI • Tailwindcss • REST API

- A website that features administrative Developed a full-stack web application for administrative appointment scheduling and product catalog management.
- Implemented an AI-powered chatbot (Gemini AI) to handle customer inquiries about services, pricing, and shop information.
- Built responsive user interfaces using React.js and Tailwind CSS.

Typetype Website

Technologies used: MongoDB • Express.js • REACT.js • Node.js • Tailwindcss • Firebase • REST API

- I designed and developed a speed-typing web application that enhances both typing speed and memorization skills, using MERN(MongoDB, Express.js, React.js, Node.js) stack.

Pet Tracker

Technologies used: Arduino • C++ • Firebase • HTML • CSS • Bootstrap • REST API

- Designed and built a GPS tracking device for pets (dogs and cats) using Arduino Nano, NEO-M8N GPS module, and SIM800L GSM module.
- Programmed the device to transmit real-time location data to Firebase via REST API integration.
- Developed a dedicated web page to facilitate downloads of the companion mobile application.

EXPERIENCE

Simplevia Technologies Inc.

January 2025 - May 2025, Remote

Role: Front-End Developer Intern

- Collaborated with a team to create, debug, and implement a dynamic web page using the Vue.js framework, integrating it with a MySQL database on the back end. Contributed to both front-end functionality and troubleshooting efforts to ensure a smooth, data-driven user experience.

EDUCATION

Bulacan State University

2021 - 2025

Bachelor of Science in Information Technology

- ITDS Research Summit 2024

TECH STACKS

- **Languages:** HTML, CSS, JavaScript, TypeScript, Node.js, Express.js
- **Frameworks & Libraries:** React.js, Vue.js, Next.js, Redux, Tailwindcss, Bootstrap
- **Version Control:** Git, Github
- **Other Technologies:** Firebase, Supabase, Sanity.io, REST-ful API, MongoDB, Gemini AI
